

ON A MISSION TO **REDUCE** **EMISSIONS.**

CITY OF SAN ANTONIO
SA CLIMATE READY

Our goal is to make San Antonio

**CARBON
NEUTRAL** by 2050.

This means that the carbon dioxide emitted by our city will be **greatly reduced** and then **balanced** by offsetting whatever is left. **This goal, though grand, is attainable.** Most importantly, it is vital to our **future economic security, public health, and quality of life.**

WHAT IS SA CLIMATE READY?

San Antonio's Climate Action & Adaptation Plan was created to address the present and future impacts of climate change. This comprehensive plan is the result of a total community engagement effort, moreover, it provides pathways for the following:

- Strategies for ensuring economic prosperity and quality of life.
- Prioritization of clean air, public health, water quality and conservation, good jobs, transportation choices, clean and secure energy, and emergency preparedness.
- Supporting market transitions and consumer options, while preparing businesses, residents, and institutions for an unpredictable climate.
- Affirming equity and affordability in all strategies to ensure that a Climate Ready San Antonio benefits all residents.

THE PLAN IS GROUNDED IN BEST AVAILABLE CLIMATE SCIENCE AND BEST PRACTICES.

The ethical framework at the core of the plan is Climate Equity. Acknowledging that San Antonio's history has produced social inequities that, if unaddressed, will worsen with climate change. **The City of San Antonio is committed to ensuring climate equity** is considered in the implementation of climate action and adaptation strategies.

STAY INFORMED. GET INVOLVED.

Learn more about San Antonio's planned path to carbon neutrality and discover what steps we are taking to help make this goal a reality.
